REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The IDS filed 9/24/2003 and 6/ 22/ 04 have been considered and do not read on nor render obvious the claimed invention. A terminal disclaimer is filed over US Patent 6388084 to overcome obvious double patenting over this reference.

The closest prior art reference is Tilley et. al. (See Reference U). The primary differences between the Tilley compound and the instantly claimed compound are the substitution on the R1 phenyl ring and the pyridine ring. In the instant compound, the R1 phenyl ring is unsubstituted and the pyridine ring is substituted with double bonded oxygen. In the Tilley compound, the R1 phenyl ring is substituted with phenyl and the pyridine ring is not substituted with a double bonded oxygen. At page 1816, see compound 16.

The prior art reference does not teach nor suggest to one of ordinary skill in the art how to modify the prior art compound to derive the instant compound. Therefore the instant claims are allowable therefrom.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Binta M. Robinson whose telephone number is (571) 272-0692. The examiner can normally be reached on M-F (9:30-6:00).
